Subject: RE: Automation framework review/demo

Hi Senthil –

We had the second session with the same group for review and demo of our framework today, here is the summary of the meeting :

- PQE group members including their Director, Manager, Architect along with automation developers, a total of 6 participants represented their group.
- I did a detailed technical walk through of our framework and a demo with a couple of test case runs.
- All their questions were asked with a comparative perspective of their framework vs. ours, were answered by me.
- PQE manager mentioned that there are no differences between their framework vs. ours; except for only Word and Excel report generation (which PQE is not currently doing)
 - Code related to these 2 features were requested to see if they can inherit these into their framework. I will send them necessary files/lines of code as needed.
 - Specific issues like handling of driver instances comparison pointed by us was justified by them that their framework's way of handling is preferred given their experience on the Highmark applications/test ids.
 - Detailed technical comparison request by Craig was shot down by PQE management citing that it does not yield any purpose
 - PQE confirmed that their framework is the preferred route for new clinical platform
 - Gunner and Craig (in my opinion) were not proactive in the call in weighing in for our newly created framework instead agreed that PQE framework will be preferred for Pega 8.4 work that's coming up.
- Vijay to join meeting with PQE (if any scheduled before this Friday) and shadow Curt (tech lead) and Keeley(resource trained by Deloitte) in case of any questions.

Please let me know if you have any questions/comments.

Thanks,
-Vijay

Subject: RE: Automation framework review/demo

Hi Senthil, sorry for spamming but I missed this point on the earlier email – For notes in grey below:
Before the call, as you requested, I had a discussion with Craig mentioning that he specifically drive the call with PQE and that I will support with technical details and demo for the discussion.

Vijay,

What is the ask from you for this call? As discussed earlier, I would like Craig and Gunner to take ownership and convince PQE. I am fine you are providing the details and explaining the rationale on the call. Let's level set the expectations with them and let me know if you need any help

Regards,
Senthil

Subject: RE: Automation framework review/demo

Hi Senthil,

This meeting was completed and PQE leadership along with their test automation team joined the call. The slide(attached) I shared was used by Craig to showcase the comparison between the frameworks.

PQE team made the following points:

- PQE framework version that we used for comparison was very old
 - Their existing framework has Page Object Model, uses Cucumber, no hard-coded test data inputs, can drive test runs via excel sheets – all these that we proposed as enhancements/new framework.
- PQE is interested to see the functional and utility library that we have on our newly created framework and logging related items that we added.
- Also, since we did a POC for Pega 8.4 version application, they would like to see a demo and discuss around the changes we introduced for this.

Craig did not make any comments about the version of PQE framework being old etc., when we were onboarded the framework was shared by Curt and Craig (along with Ash on a call) mentioned that its almost 2 years old and hence we were pulled into to help enhances the framework.

Towards the end of call, Craig agreed that there will be a follow up meeting for discussing the above points and then proceed for next steps.

Please let me know if you have any questions/comments for me.

Thanks,
-Vijay

Hi Senthil,

The ask from Gunner and Craig is a slide that talks difference between PQE and newly created framework; Attached is the slide that I created (repurposed details from our earlier decks). Also, a demo on the framework and a sample test case run during the call.

I will forward this slide along with earlier decks that we shared and requested Craig/Gunner to talk through with PQE as needed at the start of the call and I will talk technical points and demo as needed.

Please let me know if you have any questions/comments.

Thanks,
-Vijay
